Maryam Abu Gneem

Junior DevOps Engineer

+972 50 280 7232 | maryam19455@gmail.com | LinkedIn | GitHub

SUMMARY

Software Engineering graduate with hands-on experience in DevOps projects, cloud infrastructure, CI/CD, and containerized applications. Quick learner and collaborative team player with strong problem-solving skills, a solid technical foundation, and strong motivation to grow as a DevOps Engineer and contribute to real-world engineering teams.

EDUCATION, TRAINING & PROJECTS

Hands-On DevOps Course — NewTech Academy
April 2026 – September 2026

Observability Stack on Kubernetes

- Built a centralized observability solution covering metrics, logs, and distributed tracing.
- Provisioned an EKS cluster and supporting AWS infrastructure using Terraform.
- Deployed and managed observability components using Helm.

Kubernetes the Hard Way

- Manually bootstrapped a Kubernetes cluster from scratch, including certificates, etcd, control plane, and worker nodes.
- Gained hands-on understanding of Kubernetes architecture and internal components.

DevOps Developer Certification — TESI (The External Studies Institute)
2025 – 2026

End-to-End CI/CD & GitOps Kubernetes Pipeline GitHub | *DevOps Capstone*

- Designed and built a multi-stage Jenkins pipeline automating application builds, Docker image creation, security scanning, and Kubernetes deployments.
- Managed development, staging, and production environments using Helm and Argo CD following GitOps practices.
- Integrated Trivy vulnerability scanning to detect critical vulnerabilities and block insecure releases.
- Implemented Kubernetes deployments, Horizontal Pod Autoscaling, rolling updates, and deployment automation.
- Used Prometheus and Grafana to monitor application and Kubernetes cluster performance.

Cybersecurity Course — HackerU
2024 – 2025

B.Sc. in Software Engineering — Sami Shamoon College of Engineering, Be'er Sheva
2020 – 2024

Smart Shopping Platform

- Developed a full-stack web application for comparing product prices across multiple supermarkets.
- Built the application using React, Node.js, Express.js, and MongoDB.
- Integrated product data collection and REST APIs to support price comparison functionality.

TECHNICAL SKILLS

Cloud & Infrastructure as Code: AWS (EC2, VPC, IAM, S3, ECR, CloudWatch), Terraform

Containers & Orchestration: Docker, Kubernetes (incl. manual cluster bootstrapping), Helm, EKS

CI/CD & GitOps: Jenkins, GitHub Actions, Argo CD, GitOps

Observability & Security: Prometheus, Grafana, LGTM stack (Loki, Grafana, Tempo, Mimir), Trivy, vulnerability scanning

Systems & Scripting: Linux, Bash, Python, TCP/IP, DNS, HTTP/HTTPS

Software Development: JavaScript, React, Node.js, Express.js, MongoDB, REST APIs, Java, C/C++

LANGUAGES

Arabic: Native | **Hebrew:** Fluent | **English:** Intermediate
